Initial diagnostic report

Patient ID: DEMO-ARUN

Patient: Arun | Age: 74 | Synthetic case

Reported diagnosis: Acute myeloid leukemia, non-APL - synthetic

Specimen: Bone marrow - synthetic specimen BM-001

Collected: 2026-10-08

Report date: 2026-10-10

Method: Illustrative molecular panel; no real assay performed

NPM1: Not reported

FLT3-ITD: Not tested in this synthetic document

TP53: Mutation detected - synthetic result

Karyotype: Complex findings - synthetic report

History and current assessment

Patient ID: DEMO-ARUN

Patient: Arun | Age: 74 | Synthetic case

Report date: 2026-10-10

Prior treatment: No prior disease-directed treatment reported

Performance status: Not documented numerically

LVEF: Not provided in this report

Current condition: Frailty and cardiac history; current assessment pending

Review note: All values are invented solely for testing source review.

No clinical recommendation, dose or treatment order is provided.
