Initial diagnostic report

Patient ID: DEMO-MEERA

Patient: Meera | Age: 42 | Synthetic case

Reported diagnosis: Acute myeloid leukemia, non-APL - synthetic

Specimen: Bone marrow - synthetic specimen BM-001

Collected: 2026-10-08

Report date: 2026-10-10

Method: Illustrative molecular panel; no real assay performed

NPM1: Mutation detected - synthetic result

FLT3-ITD: Not detected - synthetic result

TP53: Not reported

Karyotype: Report pending

History and current assessment

Patient ID: DEMO-MEERA

Patient: Meera | Age: 42 | Synthetic case

Report date: 2026-10-10

Prior treatment: No prior disease-directed treatment reported

Performance status: Not documented numerically

LVEF: Not provided in this report

Current condition: Independent; specialist fitness documented - fictional

Review note: All values are invented solely for testing source review.

No clinical recommendation, dose or treatment order is provided.
