# Fictional Northside Pathology

Laboratory: Fictional Northside Pathology

Patient: Meera (fictional)
Patient ID: GEEVI-DEMO-0001
Accession: MAR-3301
Report type: Bone marrow morphology report
Reported by: Dr. Fictional Pathologist
Issued: Day 2
Report status: Final
Part A: Bone marrow aspirate, left posterior iliac crest. Collected Day 1
Part B: Bone marrow trephine biopsy, left posterior iliac crest. Collected Day 1

## Part A findings

Blast percentage: 62 % of nucleated cells (500-cell differential)

Morphology: Blasts with fine chromatin; granules seen in occasional cells

## Part B findings

Cellularity: 90 %

## Summary

Reported diagnosis: Acute myeloid leukaemia; cytogenetic and molecular classification to follow
